

About Women.

A woman in Birmingham, England, was lately fined \$200 for giving a good character to a bad servant.

Mrs. Partington, noticing the death of Mr. Kyan, the well-known inventor, is extremely anxious to know if he is the same person who invented kyan pepper.

Mrs. Elizabeth K. Churchill, of Providence, R. I., is now "stumping" Massachusetts in behalf of the "total prohibition" cause, generally cheered by fair audiences.

A Marcellus merchant has found some old tapestries that hung in Mme. de Sevigne's chateau. They depict the loves of Anthony and Cleopatra, and J. Edgar and Dido.

A bed showing for Maine. Four girls of Augusta were married about eighteen months ago at the same hour. Two have since separated from their husbands, and the other two have applied for divorces.

Mrs. ex-Dor. Claflin, of Massachusetts, has paid the board of twelve women since the Boston fire. Remembering that Gov. Claflin was a sufferer by the fire, such charity seems to deserve special mention.

The latest feminine justification of homicide is in New Orleans, where Mrs. and Miss Ingraham are excused for shooting at a John Kaiser in the open street, on the ground that he had committed a "breach of etiquette."

A young couple in Wisconsin were so thoroughly bent on matrimony that they rode 23 miles in an open wagon when the thermometer stood 17° below zero, to obtain a certificate. They freeze ears, hands, and feet. Still they joined their frozen hands.

There is only one lady down on rubber bladders. The slippery condition of the Milwaukee flagging the other day necessitated her sitting down with enthusiastic suddenness, and the rebound that followed drove her head through a sixty-dollar showman.

The Pennsylvania branch of the Woman's Suffrage Association reports that the receipts of the cause last year amounted to \$71,101; that petitions and tracts had been circulated, a few meetings held, and some rather discouraging efforts made to gain the ballot. The exhibition indicates apathy.

When a Maine man has a too talkative wife, he tells her he is going to Ammanquiasogomongotogon hunting, and in his absence has his friends call at the house and inquire his whereabouts. When he returns his faithful wife is exhausted, and doesn't want to speak for a month.

A "Woman's College" has been in operation during the past year near the University of Cambridge, England. Its regular course extends over three years, and is substantially the same as that of the older institution. Instruction is given by the professors and tutors of the latter. It is intended to finally obtain the admission of the College as an integral part of the University, and this plan has the sanction of both faculties.

The Little People.

The latest invention is a rubber doll that can be filled with water, and on being squeezed weeps.

An Arkansas girl having named her kitten Dolly Varden, her little brother named his Thomas Varden.

They have precocious politicians in Mobile. A five-year-old girl wishes to be informed whether Santa Claus is a Democrat or a Radical.

Little Robbie went to a show and saw an elephant for the first time in his life. When he came home his mother asked him what he had seen. Robbie replied: "An elephant, mamma, that gobbles up his front tail."

A little girl was one day reading the history of England with her governess, and coming to the statement that Henry I. never laughed after the death of his son, she looked up and said: "What did he do when he was tickled?"

"Can you name the four seasons?" asked a school visitor of a class that was on exhibition. "Yes, sir," said a bright-looking little boy. "What are they, my little man?" "Salt, pepper, vinegar and mustard," was the reply.

"Get out of my way! what are you good for?" said a cross old man to a bright-eyed urchin who happened to be standing in the way. The little fellow as he stepped one side, replied very gently: "They make men of such things as we are."

A little boy in Detroit the other day gave a little rap on his little drum, and a farmer's team got up a little runaway, and made a little bill with the wagonmaker. The farmer got a thump on his head, his boy was severely bruised, and the little boy went off to beat his drum elsewhere.

A smart boy in one of the public schools of Cadiz, Pa., having been required to write a composition on some part of the human body, expanded as follows: "The Throat—A throat is convenient to have, especially for roosters and ministers. The former eat corn and crows with it; the latter preach through his'n and ties it up."

"The crisis has come," cried a boy as he rushed into the house panting with excitement from seeing the circus enter town, "and I want a quarter."

Old Equestrian: "Well, but you are not the boy I left my horse with." Boy: "No, sir; I just speculated, and bought him of 'other boy for six cents."

"Can't you love your neighbor as yourself, Johnny?" "Yes, ma," and then adding, reflectively, "if he don't keep a dog that tries to bite little boys."

A sweet little boy only eight years old—bless his little heart—walked into the scene of a teachers' examination at Oswego, and howled out: "Amin, your fellow is down to the house!"

A five-year-old was eating a piece of bread and butter the other day, and was told: "Don't drop it, if you do it will be sure to be butter-side down." A few minutes after, his little brother picked up the kitten, and some one calling out: "she'll scratch you," caused him to let go of her suddenly, so that instead of lighting on her feet she dropped in a heap. "There," says Larry, "Pierce let the cat fall 'butter-side down.'"

The growing demand for American improved labor-saving machinery, in countries hitherto supplied almost exclusively from British and continental sources, has attracted the attention of the general public. The *Iron Age* says that at no previous time in the history of our iron and steel industries have the possibilities of successful competition with England, France, Germany and Belgium, in the production of machinery and tools for export, been so fully appreciated by our enterprising manufacturers as during the year just ended. Some instances of successful American competition with foreign manufacturers have been recorded, such as the shipment of locomotives to Russia, Austria, Alsace and Lorraine; the increasing export of shoe and leather-working machinery to Switzerland and Mediterranean countries; of gold-mining machinery to the Spanish peninsula, and of tailors' shears to England.

The Rev. Baptist Minister Nod, a well known English theologian, is dead.

Journalism in America.

On the 1st of January, 1885, there were 1,258 daily, semi-weekly and weekly newspapers issued; with these commenced the independence of the press. With all the struggles, failures and successes of the press, this was a great result. In 1870 there were published in the United States 542 daily and 4,425 weekly newspapers. The number of copies of the daily papers printed in that year reached, in round numbers, 800,000,000. The issue of the weekly publications amounted to 600,000,000 copies. All other publications printed 1,000,000,000 copies. The aggregate issue in that year of all political and literary periodicals of the country was over 1,500,000,000 copies. What an astounding exhibition! Let us look at the comparative results since 1704:

NEWSPAPER AND PERIODICAL CIRCULATION IN THE UNITED STATES.

Years.	Newspapers.	Copies Annually Printed.	Population.
1704.....	1	16,000	400,000
1775.....	4	170,000	1,000,000
1775.....	37	1,200,000	2,000,000
1810.....	359	22,221,700	7,239,814
1828.....	632	68,117,796	12,000,000
1835.....	1,258	90,361,000	14,000,000
1840.....	1,431	195,838,973	17,069,453
1850.....	2,526	426,409,978	23,191,876
1860.....	4,051	927,551,548	31,445,080
1870.....	5,871	1,508,548,250	38,555,763

It is estimated that the number of copies of newspapers printed in Great Britain in 1870 was 350,000,000 and the same in France. The census returns show that over 1,500,000,000 were issued in the United States in the same year. The following table shows very clearly how far in advance of every other country we are, in respect at least to numbers, in periodical literature. The figures are from Mr. Hudson's book, and give the number of newspapers and other periodicals published in 1870 in every part of the world:

Great Britain.....	1,456	Norway and Sweden.....	154
France.....	1,668	Netherlands.....	174
Prussia.....	389	Switzerland.....	394
Austria.....	650	Egypt.....	7
Other German States.....	407	Australia.....	14
Spain.....	357	Asia.....	26
Italy.....	723	Turkey.....	8
Belgium.....	396	Other parts of world.....	150
Denmark.....	194	Total.....	7,642
Portugal.....	26	United States.....	5,871

At the present rate of increase, in ten years there will be more newspapers and magazines printed in the United States than in all the rest of the world combined. Indeed, the American Newspaper Directory of 1872 gives the aggregate number of periodical publications in this country at 6,432, only 1,300 less in that year than in all other parts of the world. Our growth, as a nation, is more rapid; then, with common schools, churches, politicians, theatres, lectures, libraries and reading-rooms everywhere, there is a greater demand for cheap literature and cheap reading—*N. Y. Times' review of Hudson's book.*

THE SECRET OF A WIFE'S POWER.—Nothing is more beautiful than the belief of the faithful wife that her husband has all the talents, and could, if he would, be distinguished in any walk in life; and nothing would be more beautiful—unless this is a very dry time for signs—than the husband's belief that his wife is capable of taking charge of any of the affairs of this confused planet. There is no woman but thinks that her husband, the great green, could write poetry if he had given his mind to it, or else she thinks small beer of poetry in comparison with an occupation or accomplishment purely vegetable. It is touching to see the look of pride with which the wife turns to her husband from any more brilliant personal presence or display of wit than his, in the perfect confidence that if the world knew what she knows there would be one more popular idol. How she magnifies his small wit and doubts upon the self-satisfied look in his face as it were a sign of wisdom. What a councillor that man would make!

What a warrior he would be! There are a great many corporals in their retired homes who did more for the safety and success of our armies in critical moments, in the late war, than any of the "high-cock-a-lorum" commanders. Mrs. Corporal does not envy the reputation of General Sheridan; she knows very well who really won Five Forks, for she has heard the story a hundred times, and will bear it a hundred more with apparently unabated interest. What a General her husband would have made, and how his talking talent could shine in Congress!

Herbert—Nonsense. There isn't a wife in the world who has not taken the exact measure of her husband, weighed him as well as if she had ordered him after designs and specifications of her own mind, and knows him as well as if she had owned him. That knowledge, however, she ordinarily keeps to herself, and she enters into a league with her husband, which he was never admitted to the secret of, to impose upon him. In nine out of ten cases he more than half believes that he is what his wife tells him he is. At any rate she manages him as easily as the keeper does the elephant, with only a bamboo wand, and a sharp stick in the end. Usually she flatters him but she has the means of pricking clear through his side on occasion. It is the great secret of her power to have him think that she thoroughly believes in him.—*Buckley Studies.*

WHAT ARE CYCLONES?—The word *cyclone* has frequently, but incorrectly, been used as significant of an enormous or very violent meteor, as if its application was to be confined to the devastating hurricane of the West Indies, or the terrific typhoon of the China seas. It simply means a storm which acts in a circular direction, and whose winds converge, by radials or sinuous spirals, toward a centre, moving in our hemisphere in the opposite direction to that of the hands of a clock, and in the Southern hemisphere in a contrary direction. Taking this as the definition of a cyclone, it seems clear from observation alone that all storms are to be regarded as cyclonic. Volumes have been written to prove that this is not the case. But we have only to examine a few series of weather-maps from week to week to see that, wherever you have an area of low barometer into its central hollow the exterior atmosphere from all sides will pour, and that in so doing a rotary spiral or vorticeous storm is generated. The tornado, the simoom, the dust-whirlwind, the fire-storm, even the slow and sluggish storm which moves on our Western plains as the laboring wheel of the steamship buried in a heavy sea, all attest that a body can move on the earth's surface in a straight line. It is not more true with us that the Gulf Stream turns to the eastward, the Polar Stream to the westward, and the Equatorial currents to the northward, than that every air-current, in obedience to the same law, should turn to the right of the line along which from any cause it is called to move. The meteorist has therefore only to ascertain by observation where the barometer is lowest, to know at once the direction of the winds from the circumjacent districts, far and near, or at least to test the mathematical law by a grand experiment.—*Popular Science Monthly.*

A MEMORANDUM from Minister Sickles to Secretary Fish covers the points of the policy of the Spanish Republic in colonial matters. This policy puts Porto Rico under civil in place of military government, abolishes slavery, the question of immediate or gradual emancipation remaining to be determined.

News of the Week.

Texas has sent an agent to Europe for emigrants. Kentucky has two asylums full of lunatics, and wants another to fill.

Nearly all the officers of Victor Emmanuel's staff have American wives.

The Emperor of Germany has been invited to visit St. Petersburg in May.

There are 23,000 cattle in the United States. Texas alone has over 9,000,000.

A German resident of Houston, Texas, is worth \$50,000 and drives a cart.

The Duke of Hamilton's stud of racers in Paris has been sold for \$10,500.

The first piano ever made in the United States was made at Philadelphia.

The Khedive of Egypt has not been borrowing the large sums of money reported.

Florida planters contract with their laborers to give them one-third of the crops.

Massachusetts's now has 1,555 miles of railroad—an increase of 33 miles during 1872.

Monroe, a small Wisconsin village, has thirty-six men over six feet two inches high.

The new American club in Paris has 400 names and more applications than can be entertained.

Philadelphia started a Washington monument 31 years ago, and has got \$10.84 towards it.

An Arkansas trapper returns from a three months' sojourn in the swamps with \$600 worth of fur.

Three-fifths of the writing paper made in the United States comes from Holyoke, Massachusetts.

A small squirrel at Franklin, Pa., was lately surprised with eight bushels of shelled corn in his possession.

In Chicago the total number of real estate transfers in one week was 171, the total consideration \$995,845.

Since Virginia raises better samac than Sicily, it is thought to be about time to stop importing from the latter place.

The news of the intended marriage of Princess Thyra, of Denmark, with the Prince Royal of Hannover, is officially denied.

The London Metropolitan Board controls an area of 117 square miles, 418,043 inhabited houses, 40,511 householders, and a population of 3,306,987 souls.

It seems to have been decided that the Jesuits will withdraw from the Vatican immediately after the passing of the bill upon the religious corporations.

The West Point cadets will put on their best bibs and tuckers, chalk their shirt bosoms, and participate in the inaugural ceremonies at Washington.

The spiritualists are going to hold a mass meeting at Battle Creek, Michigan, soon, and try to make a few raps that will be heard all over the country.

A late Russian invention enables station masters to ascertain, by a telegraphic apparatus, the condition of all sleepers on their section of a railway line.

The Prussians have relaxed their criminal code, and as a result 1,579 criminals have been pardoned. They had only completed a fraction of their term of sentence.

Since the year 1865 Messrs. Cadet & Co., shipbuilders, Greenock, have completed 49 steamers, of the aggregate tonnage of 120,000 tons, costing upward of \$15,000,000.

A London whiskey seller lately refused to sell a man a drink, and the man went off and cut his throat. The saloon keeper is now under arrest as responsible for the death.

Near Muscatine, Iowa, January 13th, a sleigh filled with ladies and gentlemen, ran off the side of a bridge, and the party were precipitated fifteen feet to the ice below.

The Canton Lucerne possesses no less than 28 volunteer shooting societies, with 1,500 members. The Canton Argau has at present 19 cadet corps, numbering 1,401 members.

Photographs of the Chaldean tablets which are believed to contain an account of the deluge, are being prepared, and copies will be published, accompanied by a translation of the text.

The Russian official gazette announces that a diploma of honor has been conferred upon Baron Liebig for the application of his knowledge of theoretical chemistry to practical purposes.

A wealthy and prominent member of the Carlton Club, London, was lately expelled for striking one of the servants and subsequently kicking him into Pall Mall. Democracy is on the rise.

The reporters of the Pittsburgh papers were treated with a free sleigh ride on Christmas day, and responded by puff of the lively stanzas, varying from a "stick-full" to a column in length.

A German paper says that experiments have been made at Bonn with a new manageable aerial ship, before the military and civil authorities. The results are reported to have been entirely successful.

The total cost of the Boston water works up to May 1, 1872, was \$2,000,000. The number of water-takers is 36,111, and the estimated income from the sales of water during the ensuing year is \$900,000.

Application will be made to the Nova Scotia Parliament to incorporate the Acadia Steamship Company, so that their boats can run between ports in Nova Scotia, New Brunswick and the United States.

It is said that the young Marquis Ansaldo, nephew of the late Count de Cavour, and son of Count Gustavo de Cavour, the only remaining male branch of the family, is seriously attacked with slow consumption.

A special dispatch from St. Petersburg to the London Observer, says Count Schouvaloff has been sent abroad to negotiate a marriage between a Prince, whose name is not given, and a daughter of the Czar.

The *Gréol*, a comic paper, shows M. Thiers in a position tender, maneuvering with the greatest grandeur and jollity on a tightrope, and assisting himself with a balancing pole weighted at the ends with "Right" and "Left."

Notwithstanding the loss of her two provinces of Alsace and Lorraine, France has still a population of over 35,000,000 people—a diminution of only 20,000 since the last census. Her population is equal to that of all the United States, although her territory is only the area of the State of Texas.

The relations between the Porte and the dependency of Laha have become threatening. The active troubles which it is feared may grow out of the difficulty creates excitement among British Indian interests, on account of the trade relations between the inhabitants of Laha and the British port of Aden, an important point on the overland route to India.

A Kansas man dropped a little note to a neighbor's wife, inviting her to meet him under the pale silver moon. The husband got the note first, and kept the appointment. Two doctors have been at work on the Kansas man, in whom they found a rich lead mine.

A brave boy at Denton, Md., was recently threatened with arrest by a large crowd of citizens who thought he was disturbing them. He turned and, drawing a pistol, promised general death. Every body ran except one pugnacious party, who threw down the would-be murderer, and discovered that the pistol was a barn-door key. The crowd returned—they only went away because they thought they heard an alarm of fire.

Nothing can be so perfect while we possess it as it will seem when remembered. The friend we love best may sometimes wrong us by his presence, or vex us by his indolence. How sweet to think of him as he will be to us after we have outlived him ten or a dozen years. Then we can recall him in his last moments, bid him stay with us as long as we want his company, and send him away when we wish to be alone again.—*Dr. Holmes.*

A young man named Billson, at Grasshopper, Kas., lately returned from an eastern tour, filled with romance and Chesterfieldian airs. He saw a pretty, well dressed, young lady standing ankle-deep in the mud beside her episcopal paltry, and evidently waiting for assistance to mount. He sprang to her relief, made a temporary stirrup of his two hands, and was rewarded by a kick in the mouth which knocked eight dollars' worth of gold plate down his throat, while the gentle one murmured, "I'll learn you to insult me, you pig-eyed slouch of a man, you. For a nicker I'd get a lead on you that would make you wear shirts slung down the back for a month."
